```go
package models

// Request cho giao dịch
type TransactionRequest struct {
        From    string `json:"from"`
        To      string `json:"to"`
        Amount  int     `json:"amount"`
}

// Response sau khi xử lý giao dịch
type TransactionResponse struct {
        Success bool
        Message string
}
```
